## MARBLEIZED SURFACE IN QUARTZ

Cristalloo is now entering the premium section of the market to give the customers a new chain of the customized quartz in the form of marble. This gives an option to the builders and the customers for kitchen and bathroom countertops over and above other traditional materials such as granite or natural stone.

Baba Quartz believes in serving the premium customers with the creamy available products in the market. We are now launching Cristalloo a new product range of crystals with the premium features like,

*Long-lasting color and tonality*

*High Density and Vitreous Innovation.*

*Full body veins with autonomous Crysta technology*

*Grainless Surface, Extraordinary Whitest & Brightest, More Translucent*

Cristalloo also delivers the whiteness, also with Frost resistant feature is now most demanded by today's building and construction industry in countertops and engineered stones.

Cristalloo series has excellent scratch resistance and stain resistance due to its high density and high hardness. It is also embodied with the autonomous Crystal technology available in the market.

This newly launched series also conveys both the benefits and the durability of engineered stone with the appearance of high-end natural marble, matched with the appearance of white marble.

Cristalloo series has sharp, clean, tight lines and translucency similar to that of real marble. Soft and subtle undertones add depth to its appearance, and the product's grain-less surface results in better light reflection and higher shine than a grained surface would

CRISTALLO

VERSION 1.0

With the new launch of the segment for our existing and new premium customers, Baba Quartz is now presenting a creamy range of the quartz in the marble form. This is the gift from the set of new innovative team of the business firm. This not only helps the customers with the new and polished look but also provides a gesture of positive aura.

A crisp brief about the premium products are being introduced for the customers is understated. We have picked the name following the most premium stones available in the world.

The main five products are Kohinoor, Sancy, Winston, Cullinan, and Taylor.

KOH-I-NOOR

SANCY

TAYLOR

CULLINAN

WINSTON

CRISTALLO

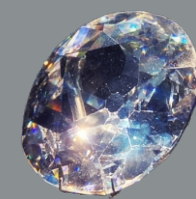

KOH-I-NOOR | C-11

CRISTALLO

KOH-I-NOOR | C-11

Kohinoor is originated from India, is well known for the cut largest being manufactured among the diamonds. The same form Cristallo includes the features like Kohinoor majorly the sparkling cut which stands out the product which is available in the market. This quartz surface is part of the Cristallo Marble collection and observes a smooth and obscure white base, with dense and remarkable dark gray veins that beautify the entire coating.

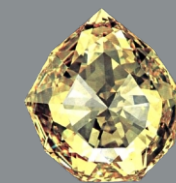

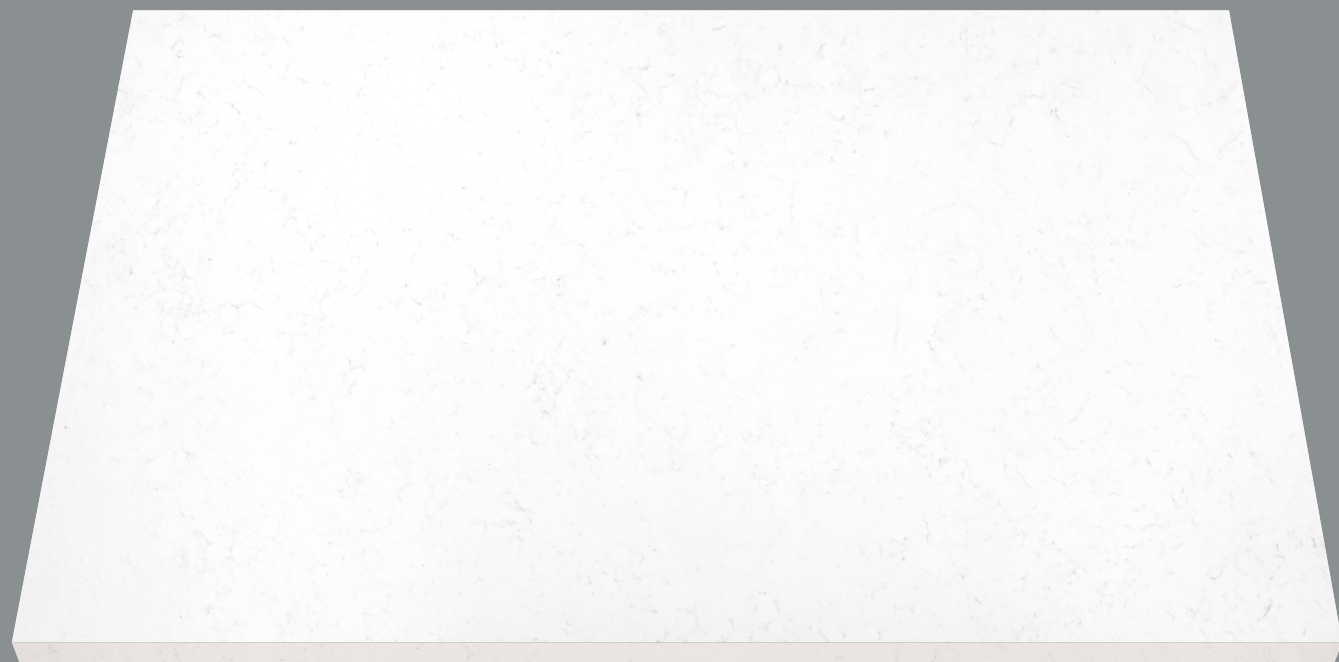

CRISTALLO

SANCY | C-12

## SANCY | C-12

Sancy is a pale yellow-colored gem that was once used to define the antiquity of the Mughals. It possesses a shield-shaped modified cut which highlights the gem in its category. The Sancy from the range of Cristaloo defines the same characteristics including the cuts and the reflection from the cuts makes the product more elegant and is preferred by the builders. Sancy is lovely marble-look carry quartz with a white background and flimsy gray veins for a soft stone-inspired look. Cristaloo combines the beauty of marble with the performance of quartz.

CRISTALLO

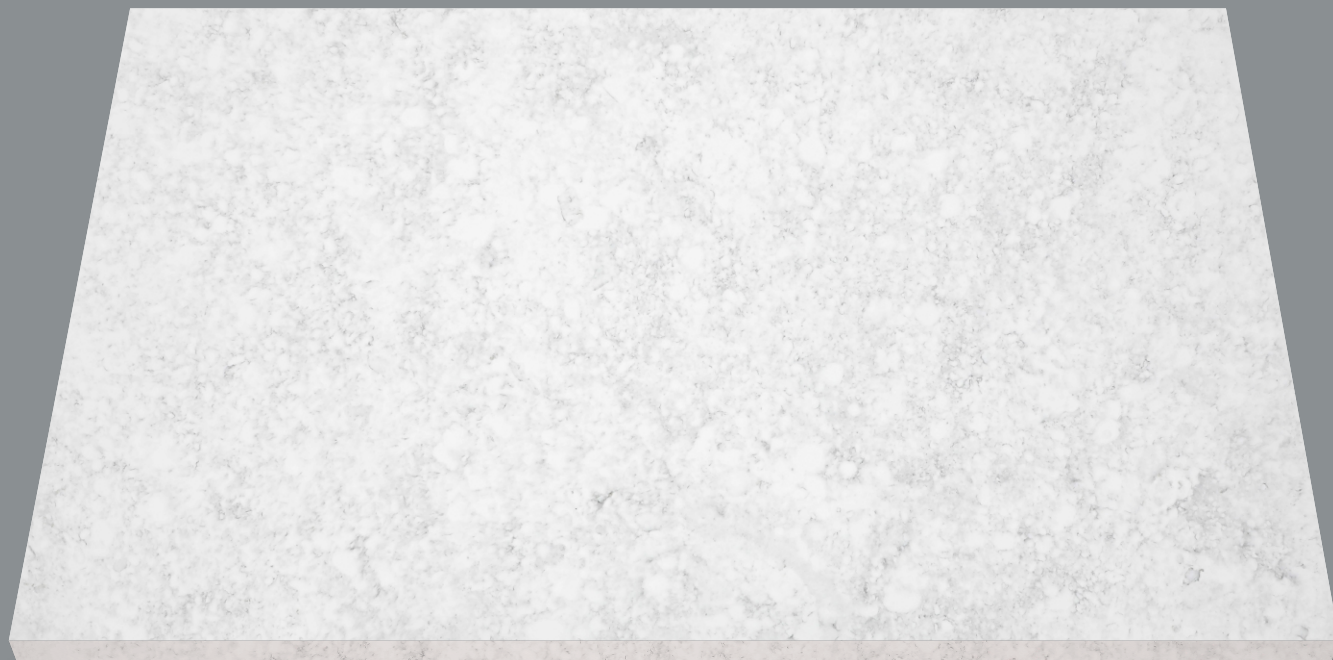

TAYLOR | C-13

CRISTALLO

## TAYLOR|C-13

The Taylor-Burton Diamond, a rare diamond weighing 68 carats. It gained fame in 1969 when it was acquired by actors Richard Burton and Elizabeth Taylor. This piece set the record price for the diamond at \$1,050,000 in public. The similar range of the product makes the stone look high-end natural marble finish; it also matches with the white marble quartz in the market. This design comes with a diverse depth and tone-on-tone appearance with vivacious grey veins giving it a unique marble appearance for a lavish look to your kitchen.

CRISTALLO

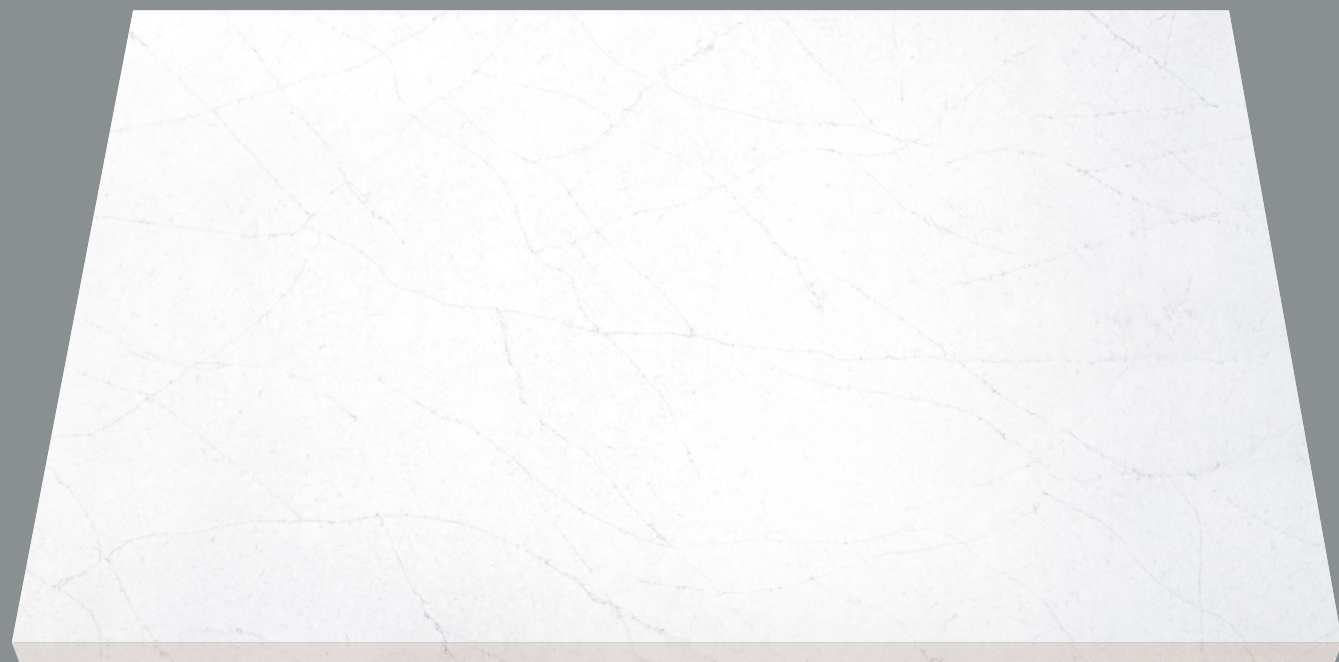

CULLINAN | C-15

CRISTALLOO

## CULLINAN | C-15

Cullinan is the roughest diamond ever found in the family of diamonds. It was found at the Premier No.2 mine in Cullinan, South Africa. The toughness and the cut make it rare in the market. The same segment from the Cristalloo provides the same kind of benefits of Cullinan with the enhanced durability of the product. Reflecting the beauty of natural marble is the newest Cristalloo Surface, Cullinan. This elegant surface flaunts a white base with full-body intertwining veins that stretch across each slab.

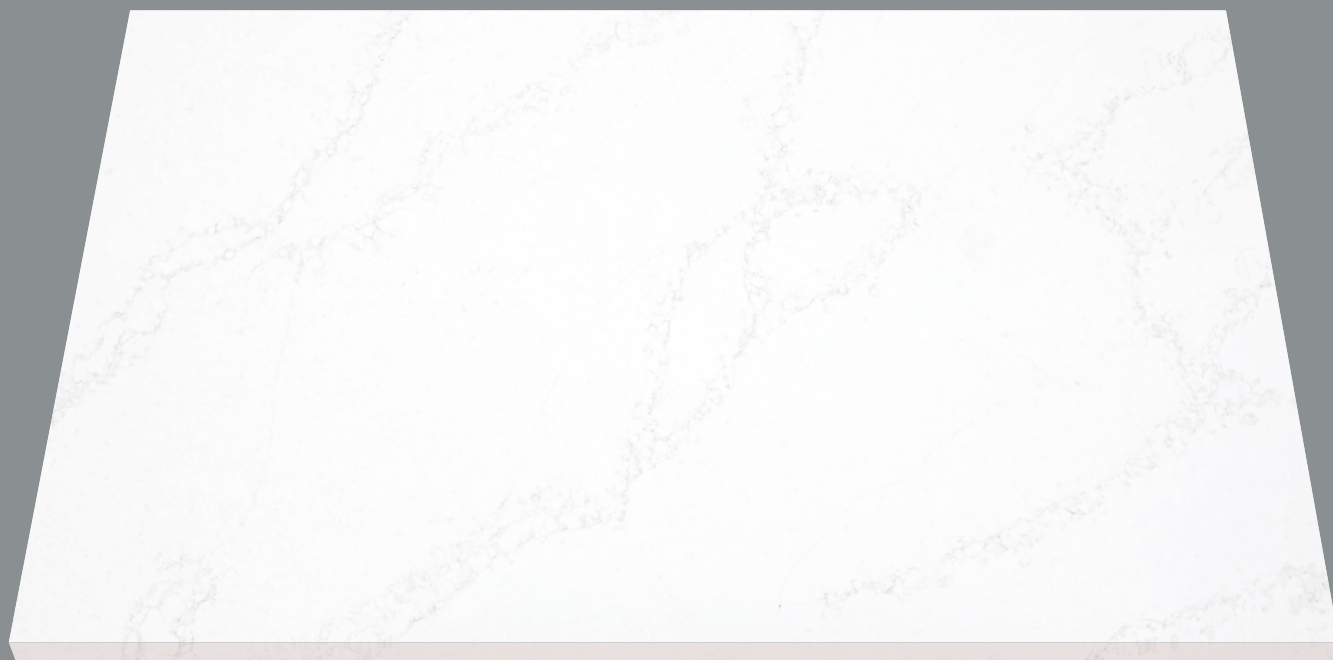

CRISTALLO

WINSTON | C-17

Winston is named after a rare kind of diamond known as The Winston Blue Diamond. A fancy vivid blue-colored diamond in the market is majorly preferred over for its rich and fancy look among the other available diamond in the market. Winston, natural quartz from the collection of Cristallo Marble, discovers quartz-like broad and incredible veins on a smooth white ice base, along with the designs run across the entire surface organically and continuously. The Winston from the closet of Cristallo brings out this product for the people who pick a fancy ambiance over a subtle one. This is attractive and is most loved among the new adult generation in the town.

# TECHNICAL SPECIFICATION

Cristalloo Quartz slabs come in standard size, offered in two thickness variants.

## SLAB SIZE

Cristalloo offers quartz slab in standard size, to suit the varying needs of different spaces.

*3200 mm x 1600 mm (126 in x 63 in)*

## THICKNESS

When you're determining what thickness of countertop you want for your project, the first step is to see what's available to you. When it comes to quartz slabs, the two most common thicknesses are 2cm and 3cm.

It's also possible to create the look of a thicker countertop by building up the edge. This can create a more substantial look and style for the space.

*20 mm (2.0 cm) & 30 mm (3.0 cm)*
